Quality Assurance Policy

Mathieu & Mitchell Ltd is committed to the provision of works of a consistently high quality that fully meets our customers' requirements and expectations while contributing to the long term survival of national architectural heritage.

Quality control functions of our Company, which are continually developed, include the following:-

Initial research and preparation for works is carried out, and, where necessary, in conjunction with a Grade 1 or Grade 2 conservation Architect, Engineer or Building Surveyor

During the course of the project weekly site meetings and on-site workshops take place that enable collaboration and input from all stakeholders on devising appropriate works

Training for new staff is provided where required

Our highly trained staff has extensive experience and can effectively deal with changing situations or unanticipated site conditions. They have the ability to accept or propose changes of methodology required to minimise intervention or to do things more than one way

Our investment in personnel who are highly skilled in all building works and have understanding and sensitivity of approach in the area of conservation and restoration ensures the work is carried out by craftspeople who are used to working with historic materials and familiar with traditional construction methods, adhering to the principle of minimum intervention and general conservation guidelines.

Our knowledge of the market for specialist skills, materials or components is enhanced by

Visiting manufacturers / suppliers regularly.

Maintaining contact with technical advisors in the related fields (e.g. one of our overseas contacts is the Technical Advisor for Socli, the largest lime manufacturer in Europe who provides information on new product testing and best practice).

Membership of various professional organisations such as the Irish Georgian Society and BLFI

Maintaining an apprentice exchange agreement with Guilds in France – Association des Campagnons du Devoir.

Our aim is to ensure that the most important surviving evidence for our built heritage is preserved as far as possible in the state in which it comes to us and is passed on to future generations without further change or loss of evidence.
